## **Rotary Plug Valves & Actuators**

### Main Catalog

SMART IN FLOW CONTROL.

## Tradition and perfection for safe, durable control valves

At VETEC, our expertise is founded on tradition and experience. We have accumulated in-depth know-how over many years and in combination with our worldwide service and sales network, we are your ideal partner.

**VETEC stands for German engineering** and control valves tailor-made for your specific application. The result are first-rate valves that meet strictest requirements.

## First-rate quality

The prime quality our products and brand are known for is based on the hard work of our highly skilled staff: every day, they do their best to satisfy your needs. Every control valve that leaves our plant is manufactured to meet the specific requirements of your process and to **function reliably** over many years.

Rotary plug valves by VETEC feature **high flow capacities** and an **excellent control accuracy** at an enormous resolution. Typically, their **K<sub>vs</sub> and C<sub>v</sub> coefficients** are two to three times **higher than those of comparable valves**. Their rangeability of 200:1 also exceeds that of conventional control valves and similar products.

## Focus on customers and process requirements

Often, the easiest aspects are the most difficult to implement. At VETEC, our focus is on what our customers need for their process. Our innovations are not made for the sake of innovation; our innovations are the result of extensive cooperation and in-depth communication with our customers.

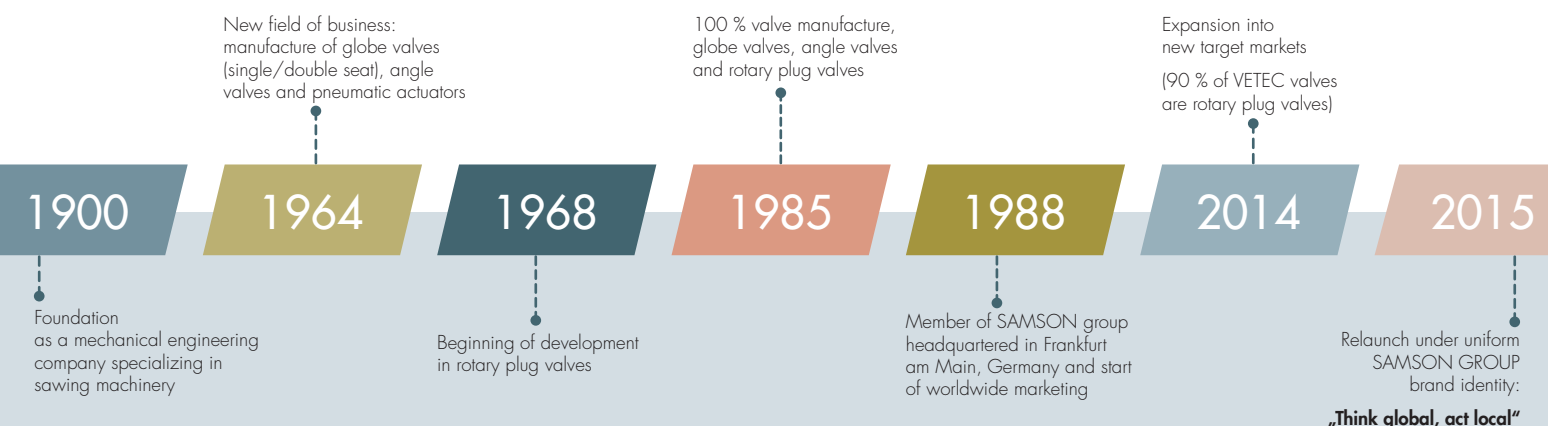

Our goal is to make VETEC products rugged tools for the safe handling of different industrial processes.

## Sustainability

As a modern industrial company, VETEC stands for **durable, sustainable values**. We use our **technical expertise** to achieve the highest level of safety, **reliability and durability** with our control valves. They are built **to meet highest expectations** and withstand **extreme ambient conditions**, such as temperature fluctuations, vibrations or offshore service. Every control valve that we make is the result of decade-long experience, continuous development and compliance with the strictest quality standards

## Who we are

VETEC is your reliable partner when it comes to achieving the best results for your company. We communicate at eye level and fairness is key to our business relations.

Special design features (optional)

- Low-emissions packing according to TA Luft and ISO 15848 (equivalent to bellows seal)
- Free of dead spaces
- Comprehensive sealing of all bearing bushings
- Stuffing box
- Extension for high and cryogenic temperatures
- Heating jacket
- Protective sleeves of ceramics and carbide metal
- Flushing connections
- Low-noise and anti-cavitation components

Properties

- Particularly high flow capacity, free passage
- Rugged, compact design
- Rangeability up to 200:1
- Blow-out-proof shaft
- Durability and maximum resistance to wear
- Excellent control behavior thanks to double-eccentric design
- Customized configurations
- Ideal to control the flow of gases, steam, liquids and solids
- Can be used to handle corrosive, sticky, highly viscous and dirt-carrying media

**VETEC Type 82.7**  
Rotary plug valve,  
short design (wafer type)

**VETEC Type 82.7-01**  
2017 version:  
upgraded design

**VETEC Type 72.3**  
Rotary plug valve,  
long design

**VETEC Type 73.7**  
Rotary plug valve, short design,  
high-pressure version

**VETEC Type 73.3**  
Rotary plug valve,  
high-pressure, long design

Design features

- Rugged, compact design
- Variable number of springs
- Optimized spring ranges
- NAMUR interface for Types R, AT, BR 31a
- Modular design:  
Optionally with manual gear, handwheel,  
mechanical travel stops or accessories
- Optionally with quick-closing function

**VETEC Type R**  
Pneumatic  
rotary rolling diaphragm actuator

**Air Torque Version A**  
Pneumatic  
double-piston rotary actuator,  
single or double acting

**VETEC Type MD**  
Pneumatic  
rotary diaphragm actuator

**Pfeiffer Type BR 31a**  
Pneumatic  
double-piston rotary actuator,  
single or double acting

**VETEC Type MZ**  
Pneumatic  
rotary diaphragm actuator

Properties

- Precise control, particularly using diaphragm actuators
- High positioning force (torques)
- Fast stroking speed
- Can be used for temperatures from  
-40 to +80 °C/-40 to +176°F
- Suitable for use in explosive atmospheres

# Possible Fields of Application

The wide variety of versions makes VETEC's **rotary plug valves** suitable for many applications. The Types 82.7, 82.7-01, 72.3, 73.7 and 73.3 Valves can be used in **throttling or on/off service** in many fields of the process industry.

## Chemicals and Petrochemicals

- ▶ Acrylic acid
- ▶ Ethylene oxide
- ▶ Butadiene
- ▶ Fluorine
- ▶ Bitumen
- ▶ Molten plastic
- ▶ Media containing solids
- ▶ Ammonia

## Industrial Gases

- ▶ Gaseous oxygen
- ▶ Phosgene
- ▶ Chlorine
- ▶ Cryogenic gases

## Water and Wastewater

- ▶ Water treatment
- ▶ Desalination
- ▶ Process cooling systems
- ▶ Steam

## Metallurgy and Mining

- ▶ Ore extraction (abrasive and corrosive slurries)

## Oil and Gas (midstream and downstream)

- ▶ Sour gas
- ▶ LNG
- ▶ Distribution and supply processes
- ▶ Media containing solids
- ▶ Crude oil, naphtha, HCO

## Special Fields of Application

- ▶ Control valves with fail-safe action
  - DVGW certification
  - Fire-safe certification

## Building Automation

- ▶ District heating
- ▶ District cooling

## Pulp and Paper

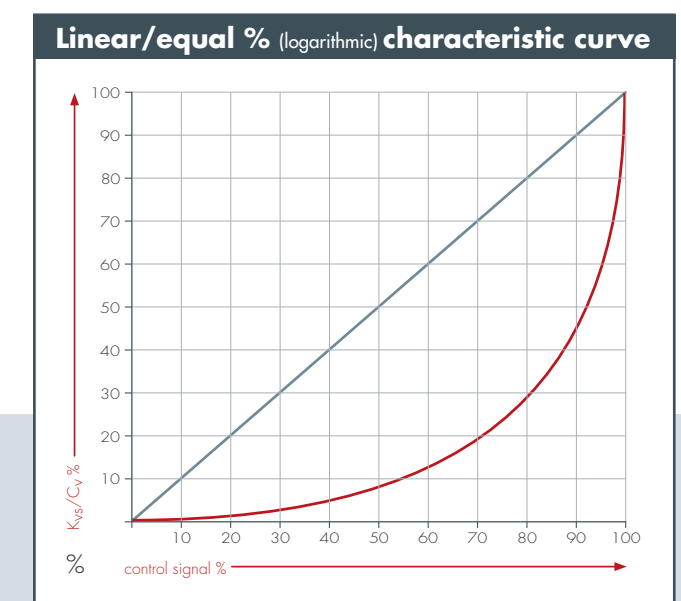

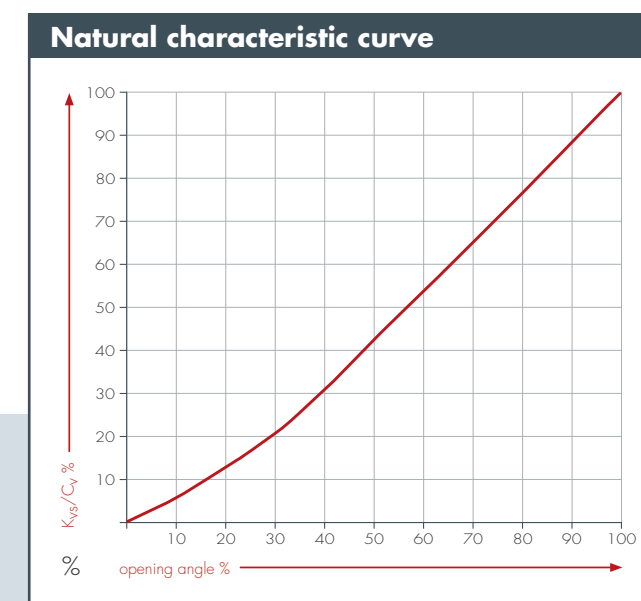

- ▶ Fibrous media

# Flow Characteristics

The process medium can flow through the valves without being deflected. VETEC valves come without shaft guide in the plug, which enables them to achieve a **free passage with very high  $K_{vs}/C_v$  coefficients**. Reduced seat trims allow the valves to be perfectly tailored to the process requirements.

The natural design characteristic can be modified to achieve a linear or equal percentage (logarithmic) characteristic using a positioner.

# Principle of Operation

The plug is lifted off the seat by the slightest rotary motion. There is no transition from static to dynamic friction between the seat and plug. The valves are not susceptible to vibration thanks to their rugged double guide bushing.

Both directions of flow are possible:

- ▶ FTO = flow-to-open (medium opens)
- ▶ FTC = flow-to-close (medium closes)

# Fail-Safe Action

Used in combination with single-acting Type R, AT, M, BR 31a and other actuators, the valve has two fail-safe positions that become effective when the supply air fails:

- ▶ FC = fail-close: the valve is closed when the supply air fails
- ▶ FO = fail-open: the valve is opened when the supply air fails

## FC Fail-close action: spring to close

## FO Fail-open action: spring to open

# Technical Data of Valves

**1** **Typ 82.7 & 82.7-01** version 2017 short design (wafer type)

	DIN	ANSI
Valve size	DN 25 to 300	NPS 1 to 12

# Technical Data of **Non-VETEC** Actuators

## 1 **AIR TORQUE version A**

Function	Pneumatic rotary actuator
Type	Double-piston design (closes counterclockwise)
Single acting	SC, SO
Double acting	DL
Sizes	60 to 10,000

## 2 **PFEIFFER Type BR 31a**

Function	Pneumatic rotary actuator
Type	Double-piston design (closes counterclockwise)
Single acting	SRP
Double acting	DAP
Sizes	60 to 10,000

# Technical Data of **VETEC** Actuators

## 1 **Type R**

Function	Single-acting pneumatic rotary actuator
Type	Rolling diaphragm
Standard	R110, R150, R200, R250
With reinforced springs	R110v, R150v, R200v, R250v, R250vv

## 2 **Type MD**

Function	Single-acting pneumatic rotary actuator
Type	Diaphragm
Standard	MD450, MD700
With reinforced springs	MD450v, MD700v

## 3 **Type MZ**

Function	Single-acting pneumatic rotary actuator
Type	Diaphragm
Standard	MZ450, MZ700
With reinforced springs	MZ450v, MZ700v

Version	DIN	ANSI
Flange version <sup>1</sup>	DIN EN 1092-1	ASME B16.5
Valve seat	Metal or soft seal	
Opening angle	75 °	
Closing direction	Counterclockwise	
Direction of flow	Both directions: flow-to-close (FTC)/flow-to-open (FTO)	
Fail-safe action	Fail-close (FC)/fail-open (FO)	
Rangeability	Up to 200:1	
Characteristic	Natural characteristic (linear or equal percentage using positioner)	
Leakage rate	IEC 60534-1	ANSI/FCI 70-2
	Metal seal: Class IV, soft seal: Class VI	
Temperature range <sup>2</sup>	-196 to +500 °C/-321 to +932 °F	
Actuator	Pneumatic, electric, hydraulic, manual gear	
Version according to	Directive 2014/68/EU, AD 2000 sheets, Directive 2006/42/EC	

<sup>1</sup> Other versions on request

<sup>2</sup> Different designs

Materials

VETEC manufactures rotary plug valves of almost all metals. In addition to the standard materials, such as cast steel and cast stainless steel, we offer versions made of steels and stainless steels for low- and high-temperature service as well as of exotic alloys.

DIN-EN (WN)	ASME equivalent	Description	Temperature range [°C/°F]
1.0619	A216 WCC (-29 to +400 °C/-20,2 to +752 °F)	Cast steel	-10 to +400 °C/-14 to +752 °F
1.4408	A351 CF8M	Cast stainless steel	-196 to +500 °C/-320,8 to +932 °F

Higher differential pressures on request.

FC = Fail-close (spring-to-close)  
FO = Fail-open (spring-to-open)

FTC = Flow-to-close (medium closes)  
FTO = Flow-to-open (medium opens)

## 1 Stuffing box TA-Luft/ISO 15848

Equivalent to bellows seal.

## 2 Double stuffing box TA-Luft/ISO 15848

Two independent low-emissions TA Luft packings.  
Equivalent to bellows seal For toxic, contaminant media.  
Optionally with test connection.

## 3 Bushing seals

Trunnion Bearing

Shaft

Bushing seals for special applications.  
Special version with O-rings on the trunnion bearing and shaft.

## 4 Heating jacket

For process media that remain liquid only above a certain temperature.  
A heat transfer medium guarantees the required temperature.

## 5 Type IT1 temperature extension

For low and high temperatures.

## 6 Type IT2 temperature extension

For cryogenic gases.

## 7 Cleaning connections

For sticky and contaminated process media, media containing solids.

## 8 Ceramic and carbide metal pockets

For abrasive, erosive and corrosive media.

VETEC low-noise components are effective, reliable and cost-effective solutions to minimize noise emissions, cavitation and erosion. The components can be adapted to the operating conditions that exist in the plant and function in both directions of flow. Existing valves can be retrofitted with low-noise components by VETEC

## 1 SM 1.0 / SM 1.5

Gases and vapors.  
Low-noise component built into the valve seat.  
 $\Delta p$  max. 40 bar

## 2 SM 2.0 / 2.5

**For low differential pressures.**  
Gases and vapors.  
 $\Delta p$  max. 10 bar

## 3 SM 2.0 / 2.5

**For high differential pressures.**  
Gases and vapors.  
 $\Delta p$  max. 63 bar

## 4 SM 3.0 / SM 3.5

Gases and vapors.  
 $\Delta p$  max. 5 bar

## 5 SM 8.0 (tube bundle)

Liquid media.  
 $\Delta p$  max. 40 bar

## 6 SM 8.1 (multi-stage trim)

Liquid media.  
 $\Delta p$  max. 40 bar

## 7 SM 4.0 / 4.5

Gas- and steam media.  
 $\Delta p$  max. 10 bar

## 8 SM 9.1

Liquid media.  
 $\Delta p$  max. 40 bar

## 9 SM 9.2

Liquid media.  
 $\Delta p$  max. 40 bar

VETEC rotary plug valves can be combined with pneumatic, electric and hydraulic rotary actuators as well as different valve accessories, such as positioners, solenoid valves, limit switches and other equipment according to IEC 60534-6 or NAMUR Recommendation.

## 1 Type 72.3/R-actuator

Accessories:  
 ▶ Handwheel  
 ▶ SAMSON positioners

## 2 Type 82.7/AT-actuator

Accessories:  
 ▶ Manual gear  
 ▶ SAMSON positioners

## 3 Type 72.3/R-actuator

Accessories:  
 ▶ Manual gear  
 ▶ SAMSON positioners

## 4 Type 73.7/R-actuator

Accessories:  
 ▶ Manual gear  
 ▶ SAMSON positioners

## 5 Type 73.7/MZ-actuator

Accessories:  
 ▶ Manual gear  
 ▶ SAMSON positioners  
 ▶ Further accessories

## 6 Type 73.3/R-actuator

Accessories:  
 ▶ SAMSON positioners

## Mounting positions for control valves

- Control valves that include types R, AT or BR 31a actuators can be mounted in any desired position.
- For control valves with types MD and MZ actuators, we recommend installation in horizontal pipelines.

## Types of actuator attachment

- Types R, AT and BR 31a actuators are suitable for valve attachment in compliance with type A, B, C or D.
- Types MD and MZ actuators are suitable for valve attachment in compliance with type B or D.
- Further types of attachment on request!

## Sample installations for control valves

### R With R-actuator · FC

### R With R-actuator · FO

### AT With AT-actuator · FC/FO

### MZ With MZ-actuator · FC/FO
