DATA SHEET

Type 44-1 B Pressure Reducing Valve · Type 44-6 B Excess Pressure Valve

Series 44 Self-operated Pressure Regulators · ANSI version

Application

Set points from 3 to 290 psi/0.2 to 20 bar with valves ½ NPT to 1 NPT as well as NPS ½ and 1 · Pressure rating Class 150 and 300 · Suitable for nitrogen and steam up to 390 °F/200 °C, liquids and air up to 300 °F/150 °C, other gases up to 175 °F/80 °C

Type 44-1 B Pressure Reducing Valve · The valve closes when the downstream pressure rises

Type 44-6 B Excess Pressure Valve · The valve opens when the upstream pressure rises

The regulators consist of a valve and an integrated actuator with an operating bellows and a set point adjuster.

Special features

- Low-maintenance proportional regulators requiring no auxiliary energy
- · Wide set point range and convenient set point adjustment
- Spring-loaded, single-seated valve without pressure balancing or plug balanced by a bellows
- · Stainless steel operating bellows as operating element
- · Compact design with particularly low overall height
- · Any mounting position possible
- Valve body made of red brass, spheroidal graphite iron or stainless steel
- Meets fugitive emissions requirements based on VDI 2440

Versions

Pressure regulators with actuator for set point ranges from 3 to 290 psi/0.2 to 20 bar \cdot Stainless steel body (A351 CF8M) with screwed ends ½ NPT, ¾ NPT and 1 NPT (female thread) \cdot Flanged body made of stainless steel (A351 CF8M) in NPS ½ and 1

Type 44-1 B Pressure Reducing Valve (Fig. 1)

Regulator with valve Class 150 and 300 for liquids up to 300 °F/150 °C, air up to 300 °F/150 °C, nitrogen up to 390 °F/200 °C and other gases up to 175 °F/80 °C

Type 44-6 B Excess Pressure Valve (Fig. 2)

Regulator with valve Class 150 and 300 for liquids up to 300 °F/150 °C, air up to 300 °F/150 °C, nitrogen and steam up to 390 °F/200 °C, other gases up to 175 °F/80 °C

Fig. 1: Type 44-1 B Pressure Reducing Valve, flanged body

Fig. 2: Type 44-1 B Pressure Reducing Valve, body with screwed ends

Special versions

- With internal parts made of FKM, e.g. for use with mineral oils
- Version free of PTFE
- · Version for flammable gases on request
- Regulator prepared for pressure gauge or external control line connection (connecting thread 1/8 NPT)
- · With FFKM internal parts (on request)
- Materials complying with FDA regulations (max. 140 °F/60 °C medium temperature)
- Version with electric set point adjustment for set points up to 150 psi/10 bar
- Version with pneumatic set point adjuster
- Version functioning as differential pressure regulator
- Type 44-6 B for steam

Principle of operation (see Fig. 3)

The medium flows through the valve in the direction indicated by the arrow. The position of the plug determines the flow rate across the area released between plug (2) and valve seat (3).

The Type 44-1 B Pressure Reducing Valve is open when relieved of pressure. The valve closes when the downstream pressure (p_2) rises above the adjusted set point.

The Type 44-6 B Excess Pressure Valve is closed when it is relieved of pressure. The valve opens when the upstream pressure rises above the adjusted set point.

In both versions, the pressure to be kept constant is transmitted through a borehole (4) in the valve body (1) to the operating bellows (5) where it is converted into a positioning force. It moves the valve plug depending on the spring rate of the set point springs (7) and the setting of the set point adjusting screw (9).

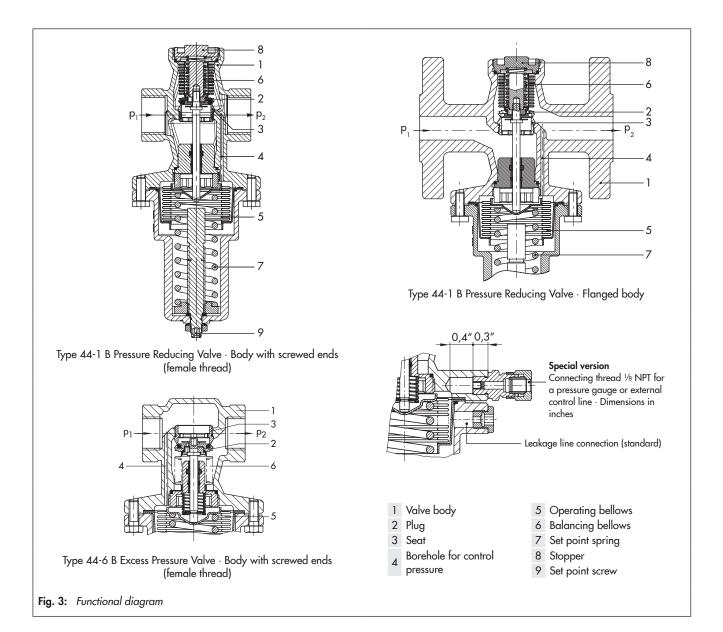

Table 1: Technical data · All pressures in bar (gauge)

Valve		Type 44-1 B Pressure Reducing Valve	Type 44-6 B Excess Pressure Valve			
Pressure rating A351 CF8M		Class 300 (body with screwed ends) ²⁾ · Class 150 (flanged body)				
Connection	A351 CF8M	½ NPT, ¾ NPT, 1 NPT female thread				
Connection	A351 CF8M	Flanges NPS ½ and 1				
	Air, liquids	300 °F/150 °C				
Max. permissible	Non-flammable gases	175 °F/80 °C				
temperature 1)	Steam	_	390 °F/200 °C			
	Nitrogen	390 °F/200 °C				
Max. perm. differential pressure Δp		150 psi/10 bar ³⁾ · 230 psi/16 bar	230 psi/16 bar			
Leakage class according to IEC 60534-4		≤ 0.05 % of K _{vs} coefficient				
Compliance		C € · FHI				
Set point range (continuously adjustable)		3 to 30 psi · 15 to 60 psi · 30 to 90 psi · 60 to 150 psi · 120 to 290 psi				
		0.2 to 2 bar \cdot 1 to 4 bar \cdot 2 to 6 bar \cdot 4 to 10 bar \cdot 8 to 20 bar				
Max. permissible ambient temperature		140 °F/60 °C				

 $^{^{1)}}$ $\,$ The maximum permissible temperature is limited to 140 °F/60 °C with FDA compliance.

FFKM ³⁾	Liquids	Up to 300 °F/150 °C		
11 N/V -/	Gases	Up to 175 °F/80 °C		

Installation

The following applies:

- The direction of flow must match the direction indicated by the arrow on the body
- Any mounting position possible

Further details can be found in ▶ EB 2626-1 and ► EB 2626-2.
