Type 3260/3374 Electric Control Valve

Types 3260/3372, 3260-1 and 3260-7 Pneumatic Control Valves

Type 3260 Globe Valve

Application

Globe valves for use in industrial applications as well as heating, ventilation and air-conditioning systems

DN 65 to 150 · PN 16 · Temperatures up to 150 °C

Special features

- Type 3260 designed as a globe valve
- Connection between valve and actuator: form-fit connection
- Type 3260 Globe Valve in special version for oils, up to DN 125
- Valves to protect panel heating according to DIN 4747 can also be combined with electric actuator with fail-safe action

Versions

Electric control valves with Type 3260 Globe Valve		
Type 3260/3374 ¹⁾	PN 16	DN 65 to 150
Pneumatic control valves with Type 3260 Globe Valve		
Type 3260/3372	PN 16	DN 65 to 150
Type 3260-1	PN 16	DN 65 to 80
Type 3260-7 ²⁾	PN 16	DN 65 to 80

¹⁾ Types 3374-25/-35 Electric Actuators with fail-safe action

²⁾ Pneumatic actuator suitable for integrated positioner attachment

Also available:

- Type 3260 Three-way Valve ▶ T 5861

Fig. 1: Type 3260/3374

Fig. 2: Type 3260-1

Principle of operation (Fig. 3)

The process medium flows through the valve in the direction indicated by the arrow in the flow-to-open direction. The cross-sectional area of flow between the seat (2) and plug (3) is determined by the position of the valve stem. The plug is moved by changing the control signal applied to the actuator. The plug stem (6) is designed to form-fit the actuator stem (8.1) and is sealed by an EPDM or FKM seal.

Fail-safe position

For globe valves mounted to an actuator with fail-safe action, the control valve has two different positions which become effective upon power supply failure:

Actuator stem extends

- The globe valve closes upon power supply failure

Actuator stem retracts

- The globe valve opens upon power supply failure

Electric actuators

The Type 3374 Electric Actuator can be controlled by three-step signals or, in the version with positioner, with signals from 0/4 to 20 mA or 0/2 to 10 V. Various electrical accessories can be optionally installed.

Types 3374-25 and 3374-35 Actuators are able to perform a fail-safe action. Refer to Table 4.

Refer to the data sheets for more details on the electric actuators:

► **T 8331:** Type 3374 Electric Actuator

Pneumatic actuators

The Types 3271 and 3277 Pneumatic Actuators as well as the Type 3372 Electropneumatic Actuator work with various control signals (see Table 5.2).

All actuators are available for fail-safe action "actuator stem extends (FA)" or "actuator stem retracts (FE)".

The Type 3277 Pneumatic Actuator is suitable for integral positioner attachment. Various optional accessories can be mounted onto the actuator.

Types 3271 and 3277 Actuator are also available with hand-wheel.

Refer to the data sheets for more details on the pneumatic actuators:

► **T 8310-1:** Types 3271 and 3277 Pneumatic Actuators

Installation of the control valve

The control valves can be mounted in any position. However, the electric actuators must not be suspended downwards. Make sure that the ambient temperature at the point of installation does not exceed or fall below the permissible temperature limits specified for each actuator.
