SAMSON

FRANKFURT AM MAIN HEADQUARTERS

Frankfurt am Main, Germany is home to the largest SAMSON production site. Here, our products are manufactured in immediate vicinity to the R&D facilities.

Continuous innovations and improvements in our production processes enable us to manufacture more quickly, maximize product reliability, and extend our product

portfolio. The latest example of this is our large valve assembly workshop completed in 2013 to meet the growing demand for valves in sizes up to NPS 28.

PRODUCTS

INNOVATIVE HANDCRAFTED TECHNOLOGY

At SAMSON, we basically manufacture all essential parts ourselves. Bodies for valves and self-operated regulators, which are machined on CNC mills, diaphragms, individual injection-

molded plastic parts and many more are made in house. Thanks to state-of-the-art equipment and a dedicated, highly skilled staff, our SAMSON products enjoy a long service life in your plant.

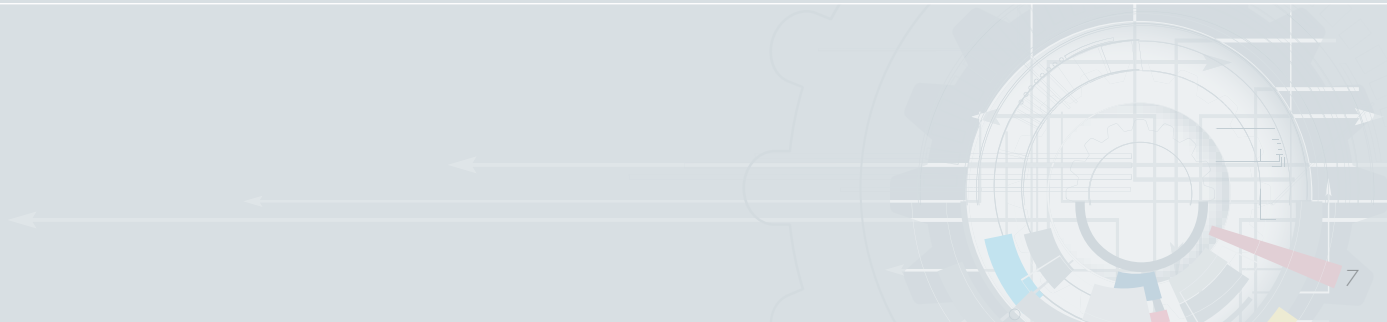

MARKETS

COST-EFFECTIVE SOLUTIONS TAILORED TO OUR CUSTOMERS' DEMANDS

At SAMSON, we focus our activities on our customers and the requirements they place on our product portfolio. The high level of in-house manufacturing enables us to respond quickly to a wide variety of customer requirements while manufacturing at optimum quality. These services

are highly appreciated by our customers from the different sectors, including the chemical and petrochemical industries, the oil and gas sector, the food and pharmaceutical industries as well as in district heating and cooling.
